Register for Alerts

Welcome to the SLC Alert emergency notification registration page. Our emergency notification system is designed to contact residents / businesses in the event of an emergency. This page allows you to voluntarily register your e-mail address, SMS (text message) device, TTY device, and I/M address, to help ensure you receive emergency notification.

To Opt-in, Click Here. Additional instructions will be provided when you register.

To stop receiving notifications, Click Here

SLC Alert is an emergency notification system powered by Everbridge. The system allows public safety personnel to provide rapid information to Salt Lake City citizens / businesses in the event of a hazardous situation. When activated, the system will call phone numbers from the 911 database in the hazard area, and will also send text-based messages to any pre-registered email or SMS (text) devices.

SLC Alert Introduction

What to Expect

During an emergency, you may be contacted by the emergency notification system. You may be instructed to evacuate, shelter in place, or you may simply receive informational updates.

When you receive a telephone notification, there will be no name on the caller ID. You will
