5400 South Continuous Flow Intersection

● ● ● Plaza 5400

● ● ● Walmart

Construction of a new continuous flow intersection (CFI) at 5400 South and Redwood Road has increased traffic flow and decreased traffic accidents. It has also made access difficult for shopping centers in the vicinity. As a result, the City of Taylorsville has worked closely with the Utah Department of Transportation (UDOT) to reconfigure the intersections slightly to permit left-hand turns into the shopping centers from the CFIs (see illustrations). Once the reconfiguration is complete (expected spring 2013) it will greatly enhance access to both the Walmart and Plaza 5400 shopping centers located adjacent to the intersection.
