● ● ● New Business: Markosian Auto Plaza

Development Scheme

Created in 2012 this project area uses sales tax increment to make improvements to the community and attract new business. Encompassing forty acres, the project is located on the north gateway to Taylorsville City and consists almost exclusively of retail properties. Most of the commercial ventures are over thirty years old and have been showing signs of their age.

With the guidance of the plan, the associated budget, and a proposed special improvement district, new businesses are being attracted to the area. Major anchors will become part of revitalized shopping centers and high-income-producing businesses such as auto dealerships have already built in the area. The new and future development will provide an attractive first impression for people entering the City at this important location and will further enhance Taylorsville's community image and overall economic development strategy.
