

Jordan Aqueduct Relocation

To prepare for the construction of a freeway-style interchange at 6200 South and Bangerter Highway, UDOT will relocate a segment of the Jordan Aqueduct that extends north and south.

Construction will occur primarily on the west side of Bangerter Highway; details of work will be updated regularly on the project website as the construction progresses.

A contractor was selected in March 2019, and work on the aqueduct relocation will begin mid-May 2019 and completed by December 2019.

Project Benefits:

When completed the aqueduct relocation will allow the construction of the new Bangarter Interchange at 6200 South to begin in early 2020 and will protect a vital water source for the western cities in the Salt Lake Valley during construction.

What to Expect:

- Daytime work activities (7 a.m. - 5 p.m.)
- Minimal nighttime activities
- Noise, dust, and vibration
- Potential travel delays
- Lane restrictions and changing travel patterns
- Trucks and equipment entering/exiting the work zone
